

Vintage Asset Management Ltd

Job description - Investment Analyst

You will be working in a small team in a growing private client asset management business.

The ideal candidate will have experience of working in the industry. They should be financially aware with a good understanding of markets and companies. They need to be highly proficient in IT including spreadsheets. They should have started on the CFA /CISI qualifications.

The role is wide-reaching and will be client-facing. It includes the following, working with the Investment Director to:

- perform performance attribution and risk assessments
- provide new investment ideas and assess opportunities for portfolios
- create and review trades for client portfolios
- contribute to the due diligence process for investment selection
- review portfolios for clients including their advisers
- develop investment proposals for existing and new clients.

We are looking, like everyone else, for someone who is bright, personable, literate, numerate, analytical and hard-working, able to work well in a team or as an individual, confident and competent to deal directly with clients and keen to help build the business, which has grown well. There is scope to take on significant responsibility over time.

The position is available for an immediate start.
